

# PIN Reset Guide

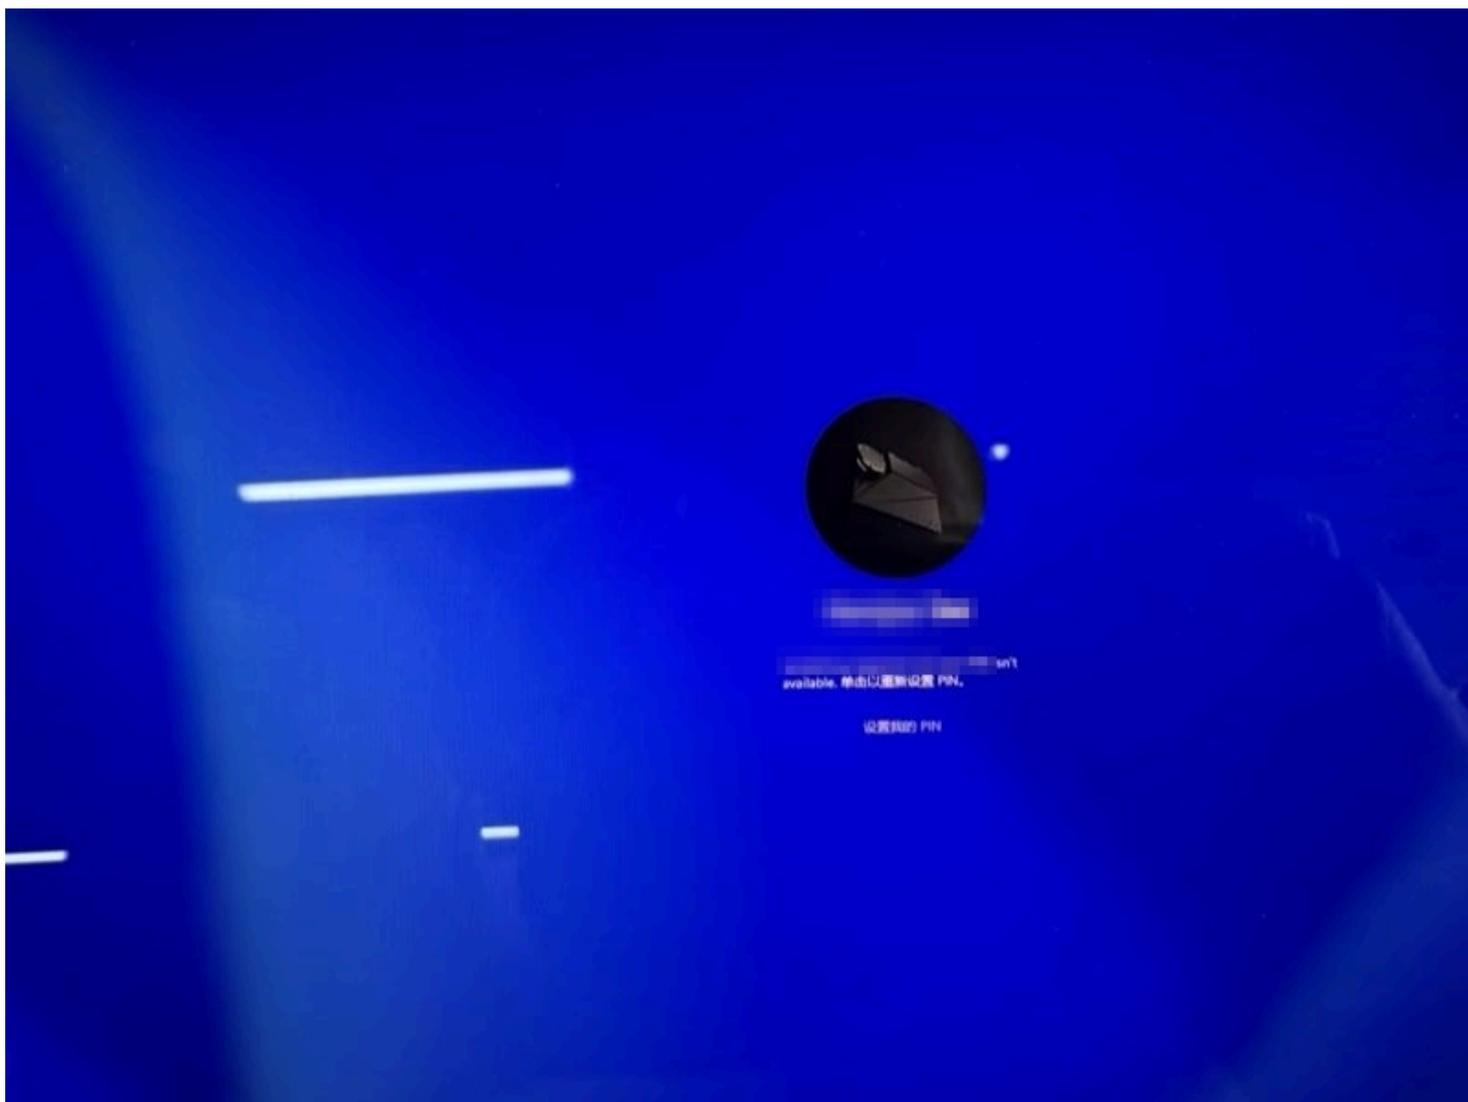

## What happened?

After a BIOS update on Mind devices, Windows may flag your PIN as a security risk and clear it automatically. This prevents fingerprint and PIN login. **Local accounts are not affected.**

## How to Reset

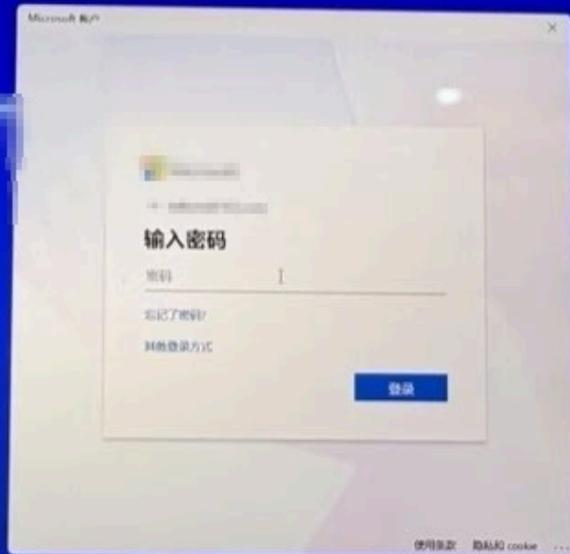

### Step 1: Click "Set up my PIN"

On the Windows login screen, click the **"Set up my PIN"** button.

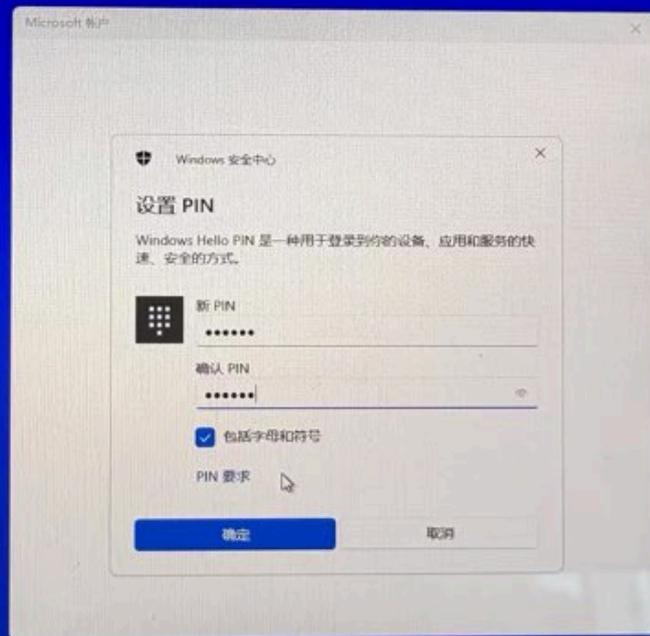

### Step 2: Sign in to your Microsoft account

Enter your Microsoft account password to verify your identity.

### Step 3: Create a new PIN

Follow the prompts to set a new PIN. Once confirmed, you're all set.

🔥 Done!

Your fingerprint and PIN login will work normally again.
